SUMMARY

I am a results-driven Software Engineer with over 3 years of experience in full-stack development, specializing in optimizing performance, enhancing security, and improving user experiences. My proficiency in the MERN stack, SSO integrations, and blockchain-based authentication allows me to create scalable, maintainable systems tailored for modern applications

EXPERIENCE

Software Engineer

Prosperasoft

📅 02/2023 - Present 📍 Pune

Company focusing on innovative software solutions

- Reduced UI rendering time by 25% by optimizing React.js components
- Refactored legacy code to improve maintainability and reduce technical debt
- Reduced redundant API calls by 40% using debouncing techniques
- Integrated SSO via Okta, decreasing login failures by 35%
- Designed microservice module, improving system scalability by 30%

Frontend Engineer

MasalaGames

📅 02/2022 - 02/2023 📍 Ahmedabad

A gaming company focused on innovative and engaging digital experiences

- Increased app responsiveness by 40% via dynamic UI enhancements
- Integrated Unity with React for immersive experiences (1000+ users)
- Built blockchain auth with Metamask & Magic.link (5000+ transactions)
- Deployed OpenSea API integration for NFT display/trade
